Summary

Fullstack developer focused on GIS systems. At Sitowise since 2022: customer GIS/asset platforms (Java/Angular legacy with 3000+ users and 10+ integrations; Azure Dotnet/React), PostgreSQL/PostGIS, and coaching GIS professionals. Ships side projects with applied AI features. Turku.

Experience

Sitowise - Fullstack Developer & Coach • GIS

September 2022 - Present (Turku, Finland)

- Software development for SAFe customer projects (GIS and asset management). Project example 1: Fullstack Java/Angular for a legacy project used by 3000+ users and 10+ integrating systems. Project example 2: Fullstack for a Azure project written in Dotnet & React. Coaching a team of GIS professionals alongside development duties.

Koutsi-Softa Oy Ab - Founder

June 2024 - October 2025 (Turku, Finland)

- Scalable platform for client management to personal trainers and their clients. Fullstack development and DevOps for a SaaS product targeting fitness professionals.

Blake Consulting - Self-employed

January 2020 - Present (Finland)

- Managing 6 event restaurants with 100+ staff simultaneously, overseeing budgeting, permitting, and execution while achieving top customer satisfaction ratings.

Prime Minister's Office - Service Coordinator

January 2019 - January 2020 (Helsinki, Finland)

- Led coordination of high-profile events during Finland's EU presidency, managing staff, security, and contractors to deliver seamless, high-quality service.

Projects

- Muksukartta (2026) – Finnish kids POI reachability PWA: isochrone/travel-time maps, React + Leaflet, public data; applied product AI for event parsing. Live: <https://muksukartta.com>
